

Mohamed Emad Mohamed

Data Engineer | BI Developer

✉ mo275mo@gmail.com ☎ +201092672715 📍 Cairo, Egypt 🔗 [LinkedIn Account](#) 🐙 [GitHub Account](#)

Profile

Final-year Computer Science student at Cairo University specializing in Data Engineering, Artificial Intelligence, and Machine Learning. Experienced in SQL, Python, Azure Data Services, Data Warehousing, ETL Pipelines, and Business Intelligence tools such as Power BI and Tableau. Completed the DEPI Microsoft Data Engineering Track and multiple AI & Data Analytics programs. Passionate about building scalable data solutions and transforming data into actionable insights.

Education

Bachelor's Degree,

Expected Graduation: 2026

Faculty of Computers & Artificial Intelligence - Cairo University
department of Operations Research & Decision Support

Certifications

- DEPI – Microsoft Data Engineering Track (2024)
- ITI Summer Internship – Business Intelligence (2025)
- CIB Summer Program – The Green Leap (2025)
- Elements of AI for Business – University of Helsinki & MinnaLearn (2025)
- Sprints x Microsoft Summer Camp – AI & Machine Learning (2025)
- Sprints x Microsoft Summer Camp – Programming using Python (2025)
- Sprints x Microsoft Summer Camp – Product Management (2025)
- Sprints x Microsoft Summer Camp – Digital Marketing (2025)
- Business Intelligence & Data Analysis Program – Link Program (2026)

Professional Experience

Data Engineer (Digital Egypt Pioneers Initiative - Internship)

Apr 2024 – Oct 2024

- Proficient in SQL and Microsoft Azure ecosystem (Data Factory, Databricks, Synapse Analytics).
- Built and optimized data pipelines following DevOps and Agile methodologies.
- Gained hands-on experience in:
 - SQL fundamentals and data warehousing
 - Python programming for data applications
 - Azure-based data solutions and MLOps tools (MLflow, Hugging Face)
- Completed technical training under the DEPI Microsoft Data Engineering track.
- Prepared for Azure Data Engineer Associate certification.

- Learned **Database Fundamentals**, **Advanced SQL**, and **SQL for BI**.
- Studied **Statistics** for data-driven decision making.
- Gained hands-on experience with **Microsoft Power BI** and **Tableau** for business intelligence and visualization.
- Practiced **Excel Analysis** for reporting and performance tracking.

CIB Summer Program “The Green Leap”

Aug 11 – Aug 27, 2025

- Gained knowledge in sustainability, ESG, climate action, AI, data science, cybersecurity, & banking systems.
- Attended workshops and sessions delivered by CIB and international partners (IFC, Euromoney Learning, SAS, Frankfurt School of Finance & Management, LinkedIn Learning, etc.).
- Enhanced professional skills including teamwork, problem-solving, and analytical thinking.
- Explored innovative approaches linking business growth with environmental and social responsibility.

Projects

[Laptop-price-prediction](#)

Sep 2024 – Oct 2024

Project Overview: This project aims to develop a machine learning model capable of accurately predicting laptop prices based on various features such as processor, RAM, storage, GPU, and brand. The model is trained on a dataset of laptop specifications and their corresponding prices, which are extracted from various online retailers using web scraping techniques.

Key Technologies Used:

- **Web Scraping:** BeautifulSoup, Selenium
- **Data Warehousing:** SQL Server Integration Services (SSIS)
- **Machine Learning:** Python, scikit-learn
- **Web Application:** Flask
- **Visualization:** Power BI

Skills

Technical Skills

Python [Pandas, NumPy, scikit-learn]
SQL Server Integration Services [SSIS]
MLOps tools [MLflow, Hugging Face]
Data Analysis & Visualization [Power BI]
Data Structures - Algorithms
OOP [Python & C++]
Microsoft Azure
Git & GitHub
Notion
SQL

Soft Skills

Problem Solving
Teamwork
Communication Skills
Adaptability
Analytical Thinking
Time Management
Continuous Learning

LANGUAGES

- Arabic: Native
- English: Professional Working Proficiency
